Topic Theme and Golden Thread

Why should rainforests matter to us all?

Let's go on a journey through the vivid, humid rainforest! We will investigate - Where are the rainforests around the world? How are the rainforests suffering? Why should they matter to us all?

We are going to investigate where rainforests are situated and what layers make up the biodiverse environment. Looking through our artistic lenses, we are going to draw a range of animals and plants we would find the rainforests, focussing on line, tone and texture.

Links to community/Courageous Advocacy – Something more

Protecting the rainforests

All things are possible if you believe	Communicators	Explorers	Readers	Believers
	Children will communicate their views on the issues facing the rainforests and how we can do our bit to protect them.	Children will explore where the worlds' rainforests are located and what lies beneath the undergrowth of this biodiverse environment!	Children will read their class novel – 'Explorer', which will give us in an insight into what it would be like to be trapped in the rainforest!	Children will learn to stand up for what they believe in and learn how they can play their part in protecting the rainforest.
